

Play Lab

News

Summer has arrived!

Summer has arrived in the Play Lab! We've got water blocks, kinetic beach sand, and shells & other ocean fossils to discover. There are water beads, a table of nifty ocean-themed construction manipulatives and a new bin of goodies on the light table!

Next week, the inflatable pool will make a return visit with a fishing game, and the big ramp will be temporarily replaced with a special "Tell Me A Story" corner. What kinds of adventures will your students cook up?

Nothing says summer to my family more than playing Mini-Golf! What kind of mini-golf course can your students build in the Construction Zone? The Big Blue Blocks, the Gigantic Wooden Blocks, the Oversize Tinker Toys, and the MegaMagnatiles are all available for their use. And what about the Rig-a-ma-jig? How could that be incorporated? I'd love to see pictures of your class' course!

The Lincoln Logs have been put away and a campsite has sprouted in their place! What kind of camping adventures might your students go on? Could they build a "campfire" and tell stories? Where would they go hiking in the woods? What kinds of things might they experience? The Big Blue Blocks can be used to create all kinds of camping-related fun in the Construction Zone for this theme.
